DASSAULT SYSTEMES

Problem statement

Organizations manage thousands of documents such as **contracts, policies, reports, and approvals** across multiple departments.

However, most systems rely on:

- Approval requests are commonly handled through email communication.
- Documents are stored in individual or shared local directories.
- Tracking the progress of documents is often performed manually.

This leads to:

- Approval processes become time-consuming.
- Document status and location are difficult to monitor.
- Sensitive information may face potential security vulnerabilities.

DASSAULT SYSTEMES

Problem description

Document management in many organizations is **fragmented and inefficient**.

Common issues include:

- Documents stored in multiple locations
- Difficulty in tracking approval status
- Limited access control and security

Impact on Organizations

- Slow decision-making
- Reduced productivity
- Risk of losing important documents
- Compliance and audit difficulties

Tamil Nadu Innovation Modernization through Problem Solving and Advanced Creative Tech

TIDCO

DASSAULT SYSTEMES

Objectives

1. Centralized Document Storage

Create a unified platform where all documents are securely stored and easily searchable.

2. Smart Approval Workflows

Automate multi-level approval processes for faster and structured decision-making.

3. Secure Access Management

Implement role-based access control to ensure only authorized users can view or edit documents.

4. Version Control & Document History

Maintain document versions and track every modification for transparency.

5. Automated Notifications & Reminders

Send alerts for pending approvals and upcoming document reviews.

DASSAULT SYSTEMES

Value Proposition of Our Solution

Our proposed system delivers measurable benefits by transforming document management into a **structured digital workflow**.

Key Value Delivered

- **Operational Efficiency** – Saves time in searching, sharing, and approving documents.
- **Process Transparency** – Provides clear visibility of document status and approval stages.
- **Improved Collaboration** – Enables secure document sharing across departments.
- **Risk Reduction** – Ensures security through role-based access and audit trails.
- **Future-Ready Infrastructure** – Easily integrates with existing enterprise systems.

Key Message

The solution transforms **fragmented document handling into a streamlined and intelligent management system.**

Findings

What We Discovered from Document Handling Practices

- **Information Overload** – Organizations generate large volumes of document without structured management systems.
- **Process Delays** – Manual approvals and unclear responsibilities slow down decision-making.
- **Knowledge Silos** – Documents remain isolated within departments, limiting collaboration.
- **Operational Inefficiency** – Employees spend excessive time searching for files instead of productive tasks.

Key Insight

Effective document management is not just about storage — it is about enabling faster decisions and seamless collaboration.

TIDCO

DASSAULT SYSTEMES

Conclusion

- This proposed system provides a centralized and intelligent approach to managing organizational documents. By integrating **secure storage, automated approval workflows, role-based access, and real-time tracking**, the system simplifies the entire document lifecycle.

- This solution helps organizations **reduce delays, improve transparency, strengthen document security, and enhance collaboration across departments**.
